

**Call for Papers**  
**Special Issue of *Computational Management Science***

**Financial Networks**

**Guest Editor:**  
**Anna Nagurney**  
**Isenberg School of Management, University of Massachusetts Amherst**

**Areas of Interest**

Networks are a powerful scientific framework for the modeling, analysis, and solution of complex economic, social, and management problems.

Financial networks, in particular, have evolved to become a theoretical and computational paradigm for a spectrum of decision-making problems from the micro to the macro levels, and ranging from portfolio optimization to systemic risk assessment, financial intermediation, contagion analysis, and even electronic finance.

This special issue of *Computational Management Science* seeks to capture the state-of-the-art of financial networks through high quality, original research papers that include numerical results.

**Reviewing Information**

The submitted papers will be peer-reviewed by anonymous reviewers according to the standards of a leading international journal.

**Submission Information**

The deadline for submission is July 15, 2012. Manuscripts must be written in English and conform to the style of the journal *Computational Management Science* and not exceed 25 pages.

**Please submit manuscripts to:**

<http://www.editorialmanager.com/cmssc/>

**and select Article Type: S.I. Networks, to ensure proper processing.**

**If you have questions, the Guest Editor can be contacted at:**
