List of Figures	xiii
List of Tables	xvii
Preface	xix
List of Contributors	xxi
1 Financial and Economic Networks: An Overview	1
<i>Anna Nagurney</i>	
1.1 Background	1
1.2 Financial Networks	4
1.2.1 Optimization Problems	4
1.2.2 Equilibrium Problems	7
1.3 Economic Networks	9
1.3.1 Equilibrium Problems	10
1.4 The Internet and New Directions	13
1.5 Outline of the Volume	14
1.6 Notes	20
I Financial Networks	27
2 On Structural Properties of the Market Graph	29
<i>Vladimir Boginski, Sergiy Butenko, and Panos M. Pardalos</i>	
2.1 Introduction	29
2.2 Notations and Definitions	30
2.3 Theoretical Models of Real-Life Graphs	31
2.4 Structure of the Market Graph	33
2.4.1 Constructing the Market Graph	33
2.4.2 Connectivity of the Market Graph	35

2.4.3	Degree Distributions in the Market Graph	36
2.4.4	Cliques and Independent Sets in the Market Graph . .	38
2.4.5	Instruments Corresponding to High-Degree Vertices . .	42
2.5	Conclusion	43
3	Multistage Portfolio Analysis with Transaction Costs	46
	<i>Nalan Gülpinar, Berç Rustem, and Reuben Settergren</i>	
3.1	Introduction	46
3.2	Problem Statement	48
3.3	Multistage Stochastic Programming Model	54
3.3.1	Computation of Transaction Costs	55
3.3.2	Constraining Intermediate Risk/Return	56
3.3.3	Implementation Issues: Saving Space	56
3.4	Performance	58
3.4.1	Implementation	58
3.4.2	WATSON Data	58
3.4.3	Backtesting	59
3.5	Conclusions	63
4	A Stochastic Network Approach for Integrated Financial Plan-	67
	ning	
	<i>John M. Mulvey, Koray D. Simsek, and Bill Pauling</i>	
4.1	Introduction	67
4.2	Multi-Period Investment Model	69
4.3	Empirical Analysis	76
4.4	Conclusions and Future Research	82
5	Variational Inequalities for Evolutionary Financial Equilib-	84
	rium	
	<i>Patrizia Daniele</i>	
5.1	Introduction	84
5.2	The Evolutionary Financial Model	85
5.3	Some Theoretical Results	90
5.4	Variational Inequality Formulation Proof and Existence The-	100
	orem	
5.5	Computational Procedure	103
5.6	Summary and Conclusions	106
6	The Growing Importance of Networks	110
	<i>Stijn Claessens, Gergely Dobos, Daniela Klingebiel, and Luc Laeven</i>	
6.1	Introduction	110
6.2	The Increasing Importance of Networks in Finance	111
6.2.1	Changes in the Financial Services Industry	111
6.3	Economic Characteristics of Networks and their Effects . . .	115
6.3.1	Economies of Scale on the Supply Side	115

6.3.2	Economies of Scope on the Supply Side	119
6.3.3	Economies of Scale on the Demand Side	121
6.4	Implications for Competition Policy in the Financial Sector .	128
6.5	Concluding Remarks	132
7	International Financial Networks with Electronic Transactions	136
	<i>Anna Nagurney and Jose Cruz</i>	
7.1	Introduction	136
7.2	The International Financial Network Model	138
7.3	Qualitative Properties	151
7.4	The Algorithm	155
7.5	Numerical Examples	158
7.6	Summary and Conclusions	165
8	Using Financial Options to Hedge Transportation Capacity	169
	<i>Stephen M. Law, Alexandra E. MacKay, and James F. Nolan</i>	
8.1	Introduction	169
8.2	Historical Rail Transportation Markets	171
8.3	The Rail Market of Today	172
8.4	The Demand for Hedging Instruments in the Rail Industry .	175
	8.4.1 The Development of Hedging Instruments in Other Industries	176
	8.4.2 The Incentive to Participate in a Hedging Market in Rail Transportation Capacity	178
8.5	The Existence of Derivatives for Rail Freight Car Capacity .	181
	8.5.1 A Hypothetical Derivatives Contract for Coal Transportation	182
	8.5.2 Interpreting the Results	187
	8.5.3 Additional Key Features	189
8.6	Conclusions and Future Research	189
II	Economic Networks	195
9	A Supply Chain Network Economy	197
	<i>Ding Zhang, June Dong, and Anna Nagurney</i>	
9.1	Introduction	197
9.2	A Network Model of the Supply Chain Economy	200
9.3	Equilibrium Conditions	205
	9.3.1 An Example	208
9.4	Qualitative Properties	209
9.5	Summary and Conclusions	211

10 Applications of Fluid Modeling in Distribution Systems	214
<i>Soulaymane Kachani and Georgia Perakis</i>	
10.1 Introduction	214
10.2 The Dynamic Network Loading Fluid Model	218
10.3 Assumptions and Notation	220
10.3.1 Modeling Assumptions	220
10.3.2 Notation	221
10.3.3 Estimation of Sojourn Times in Practice	224
10.4 Formulation of the Dynamic Pricing Model	224
10.5 Connecting Delay to Demand Models	228
10.6 An Existence Result	230
10.7 Conclusions	232
11 An Agent-Based Evolutionary Trade Network Simulation	237
<i>Floortje Alkemade, J. (Han) A. La Poutré, and Hans M. Amman</i>	
11.1 Introduction	237
11.2 The Economic Trade Network Model	238
11.2.1 Heterogeneous, Boundedly Rational Consumers	239
11.2.2 Heterogeneous Adaptive Producers	242
11.2.3 Profit-Maximizing Intermediaries	244
11.2.4 Market Dynamics	244
11.3 Agent Learning	245
11.4 Experimental Design	246
11.5 Results and Discussion	248
11.5.1 Producers Using a Downward Sloping Price Demand Curve	248
11.5.2 Producers Using the Derivative Follower Pricing Algo- rithm	250
11.6 Conclusions	252
12 Evolution of Worker-Employer Networks and Behaviors	256
<i>Mark Pingle and Leigh Tesfatsion</i>	
12.1 Introduction	256
12.2 The ACE Labor Market Model	262
12.3 The Computational Experiment	266
12.4 Experimental Findings	271
12.5 Concluding Remarks	283
13 Capacity Provision Networks	286
<i>Xianjun Geng, Ram Gopal, R. Ramesh, and Andrew B. Whinston</i>	
13.1 Introduction	286
13.2 The CPN Model	291
13.2.1 Location Management	294
13.2.2 Proxy Pruning	296
13.2.3 Cooperative Replacement	297

13.2.4 CPN Trading Hub Model 299

13.3 Economic Foundations of CPN 301

13.3.1 Modeling Cache Trading Efficiencies 301

13.3.2 A Bilateral Cache Trading Model 303

13.3.3 Multilateral Cache Trading 306

13.3.4 Major Conclusions from the Analysis 307

13.4 Tactical Trading Models of CPN 308

13.4.1 MM Model 310

13.4.2 The Double Auction Model 312

13.5 Conclusion 314

Index **317**
