### 2014 INFORMS BOARD OF DIRECTORS

#### PRESIDENT

Stephen M. Robinson  
University of Wisconsin—Madison

#### PRESIDENT ELECT

L. Robin Keller  
University of California, Irvine

#### PAST PRESIDENT

Anne G. Robinson  
Verizon Wireless

#### SECRETARY

Brian Denton  
University of Michigan

#### TREASURER

Nicholas G. Hall  
The Ohio State University

#### VP EDUCATION

Joel Sokol  
Georgia Institute of Technology

#### VP INFORMATION TECHNOLOGY

Bjarni Kristjansson  
Maximal Software

#### VP INTERNATIONAL ACTIVITIES

Grace Lin  
Institute for Information Industry

#### VP MARKETING, COMMUNICATIONS & OUTREACH

E. Andrew (Andy) Boyd  
University of Houston

#### VP MEMBERSHIP & PROFESSIONAL RECOGNITION

Ozlem Ergun  
Georgia Institute of Technology

#### VP MEETINGS

William (Bill) Klimack  
Chevron Corporation

#### VP PUBLICATIONS

M. Eric Johnson  
Vanderbilt University

#### VP PRACTICE ACTIVITIES

Jonathan Owen, CAP  
General Motors

#### VP CHAPTERS & FORA

David Hunt  
Oliver Wyman

#### VP SECTIONS & SOCIETIES

Paul Messenger, CAP  
University of Alberta

#### EXECUTIVE DIRECTOR

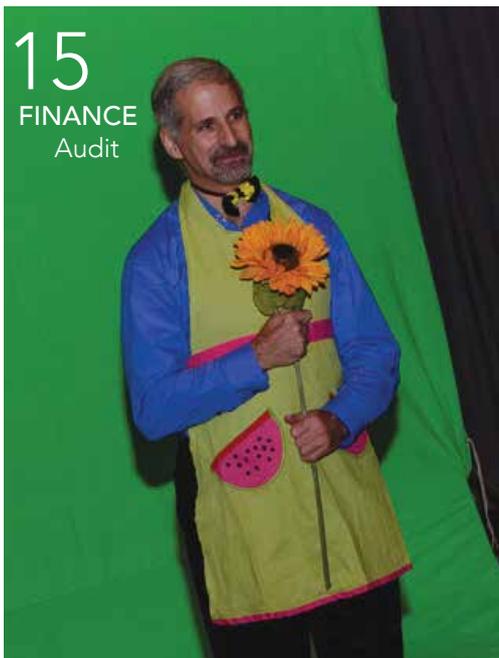

Melissa Moore  
INFORMS

# 8

## STRATEGIC GOALS & INITIATIVES

- Goal 1: Analytics
- Goal 2: Up-to-Date Online Systems
- Goal 3: Increased Analytics-Based Value to Academics

# 15

## FINANCE Audit

## INFORMS Annual Report 2013

INFORMS has much to be proud of and many to thank for our increasing success – starting with you, our members. Through our shared dedication to advancing operations research, the management sciences, and analytics, INFORMS has become part of an elite group of professional associations that continue to self-publish highly respected journals, host conferences that attract thousands of academics and practitioners, and achieve international prominence through our expanded services to the profession and members.

The INFORMS Board of Directors and administration have been addressing strategic issues facing our field and our association. Mindful of the radical speed with which technology is changing the way we conduct our work, our capacity for achieving more with less, and the very nature of membership, we are working toward strategic goals in three key areas:

- 1 To establish INFORMS as the leading association for advanced analytics professionals by advancing the practice, research, methods, and applications of advanced analytics and by serving analytics professionals with products and services they value. We are doing this by developing programs in continuing education and certification, launching our new Career Center, and expanding our outreach.*
- 2 To provide up-to-date online systems that enable access, collaboration, and the effective exchange of information among our members. Activities to support this goal include online content sharing, a metadata database, the new INFORMS Connect, and up-to-date systems at headquarters.*
- 3 To deliver increased analytics-based value to our academic members. This goal was approved in the fall of 2013. We are already striving to meet this goal through the expansion of the “Focus On” series and the development of resources and workshops for teaching analytics. We are also developing a new DataConnect service that would connect members who need datasets for research and teaching with available datasets.*

The value of our efforts is reflected in the growth in our membership, which now exceeds 11,000 members for the first time since the 1990s. Meeting attendance is strong, and approval ratings are high; our publications continue to receive acclaim; and we are financially sound enough to invest in developing services that will make us an even better resource for you.

In a challenging time for associations, INFORMS continues to thrive by diversifying our services, capitalizing on emerging technologies, and investing in our infrastructure to continue making progress. The board and staff are committed to this path of excellence with the goal of providing unparalleled value for our members and stakeholders.

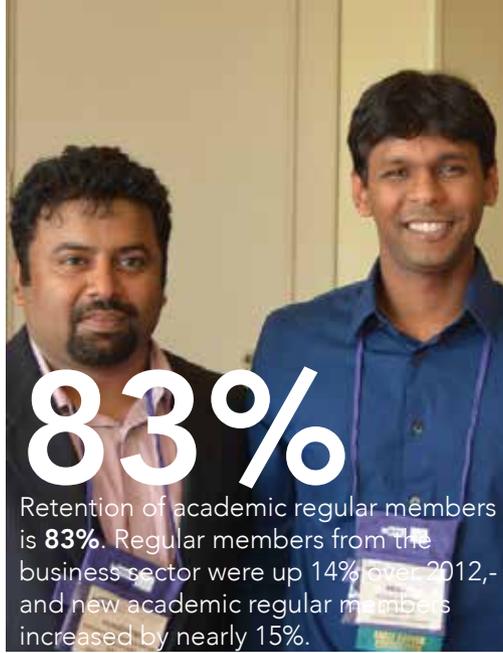

Anne G. Robinson, Past President (President 2013)

Stephen M. Robinson, 2014 President

L. Robin Keller, President Elect

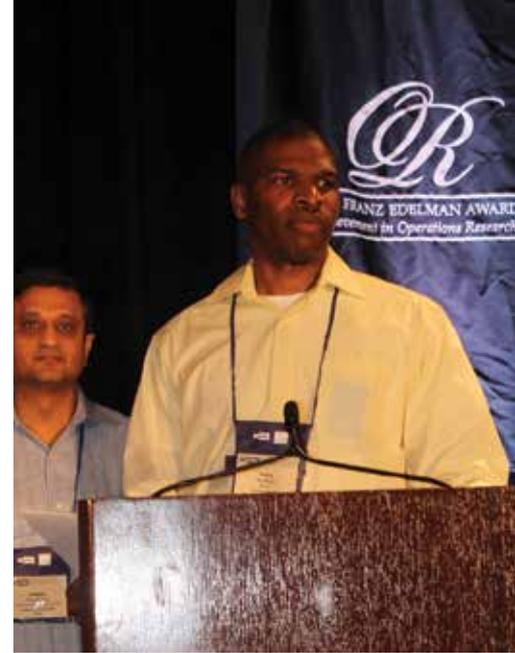

M. Melissa Moore, Executive Director

83%

Retention of academic regular members is **83%**. Regular members from the business sector were up 14% over 2012, and new academic regular members increased by nearly 15%.

MEMBERSHIP 1999-2013

7,382

More members are recognizing the value and importance of membership in our communities; they are the heart of networking in INFORMS—providing information, opportunities for collaboration and knowledge sharing. In 2013, the number of regular members belonging to a subdivision increased by 6%, with over 82% of those belonging to more than one. For students, the place to be is in our chapters and fora: This year, the number of students belonging to chapters and fora increased by 24% and 25%, respectively. Overall, 7,382 members are members of a subdivision, including 4,975 regular and retired members and 2,407 student members.

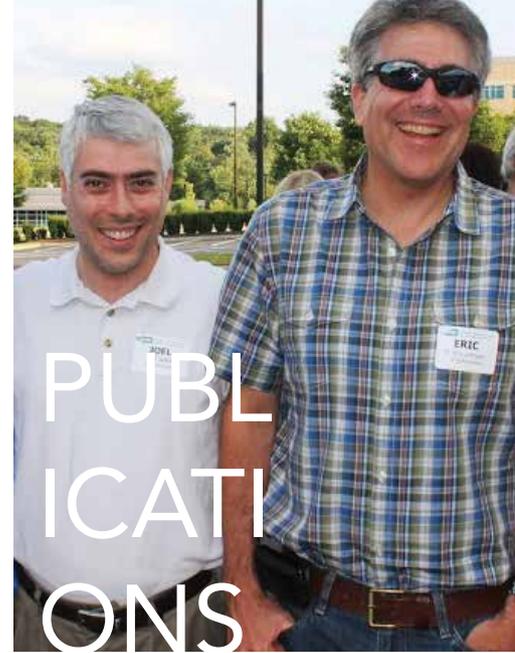

11,106

INFORMS grew to well over **11,000** members in 2013 – our highest number since 1999! Helping to drive this was a 17% increase in the number of new members. We achieved gains in all classes of membership, with our largest increase in regular members.

We continue to be a strong, independent scholarly publisher. INFORMS publishes 14 journals, including the recently added *Service Science*, the soon-to-debut *Strategy Science*, and the open access journal *INFORMS Transactions in Education*.

PUBLICATIONS

# 5,995

INFORMS journals remain the top in their fields. Original submissions to INFORMS journals continue to increase, with 2013 seeing **5,995** new manuscripts submitted for consideration. Google Scholar Citations have nine INFORMS journals ranked in the top 20 of their respective categories, including business, economics, and management; strategic management; marketing; operations research; mathematical optimization; and human resources and organizations. The highest ranked are *Management Science* and *Organization Science*, which ranked numbers two and three, respectively, in the strategic management category.

# MEE TIN GS

The Analytics Conference continues to be a great success; attendance and exhibits increase year over year. Both have nearly doubled since the meeting was rebranded to focus on analytics. A highly anticipated meeting each year, the Analytics Conference includes opportunities to network, learn, and exchange thoughts on analytics and O.R.—especially ways to increase the positive effect they have on profits.

# 4,368

Thousands of people make attending the INFORMS Annual Meeting a priority each year. At the 2013 Annual Meeting in Minneapolis, the total attendance was **4,368**. Although attendance fluctuates from year to year, since 2007 the number of people attending has remained over 4,000. This meeting continues to demonstrate its value to our members and potential members.

The 2013 INFORMS Healthcare Conference attracted slightly greater attendance and exhibits than the previous healthcare conference in 2011. INFORMS will continue to offer the healthcare conference every other year. This is a growth area for O.R. and analytics, and the demand is expected to grow.

# COMMUNITIES

# 11, 22, 5, 30

In internal surveys, INFORMS members identify communities, also known as subdivisions, as an important source of loyalty and satisfaction. INFORMS has

- **11** large, focused societies such as the INFORMS Society for Marketing Science
- **22** sections for those in specific industries and subspecialties such as analytics
- **5** fora that unite members around professional interests such as the role of women and minorities in the field
- Omega Rho, the distinguished student honor society
- The Roundtable, with representatives of major corporate departments
- More than **30** local and regional chapters
- Student chapters at dozens of universities

We are pursuing initiatives to increase awareness and collaboration among our members and subdivisions, including a new public relations effort to bring greater public awareness of operations research specialties such as marketing science and decision analysis.

*To establish INFORMS as the leading association for advanced analytics professionals by advancing the practice, research, methods, and applications of advanced analytics and serving analytics professionals with products and services they value.*

### CONTINUING EDUCATION

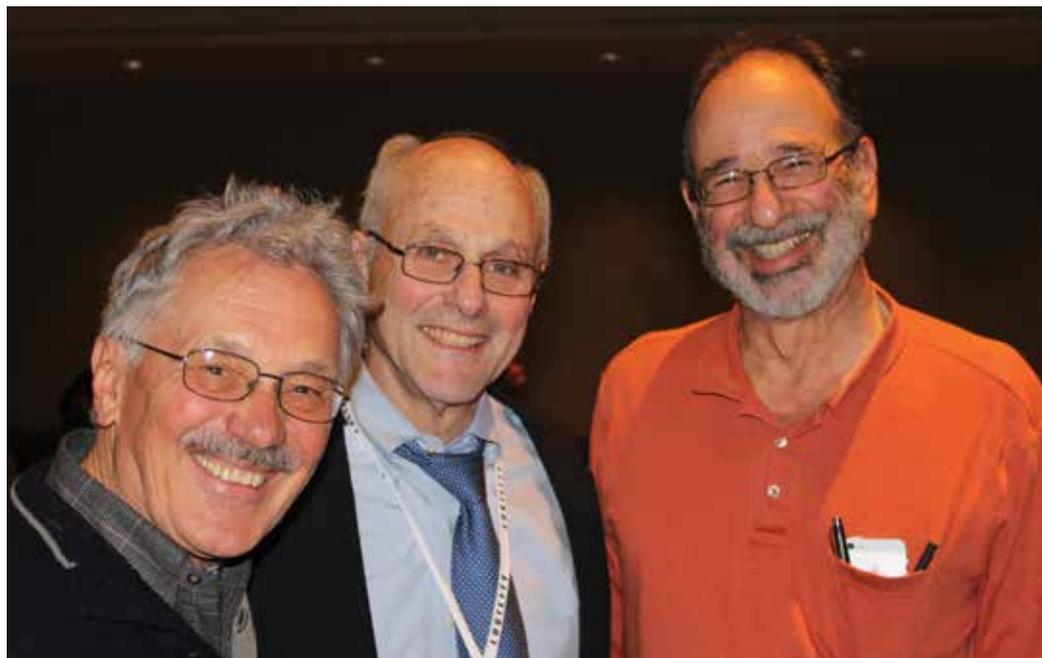

INFORMS launched this initiative to increase the quality of professional education, to create greater awareness of our analytics prowess, and to advance the practice of analytics. Preparations culminated at the end of 2013 with our first two courses: "Data Exploration & Visualization" and "Essential Skills for Analytics Professionals." These courses are being continued in 2014, and INFORMS expects to offer at least two new courses in the second half of the year: "Predictive Analytics" and "Simulation." INFORMS is exploring a course in optimization modeling as well. INFORMS will continue to work with an adult education consultant during the development of the new courses to ensure that they meet our standards for adult learners. By the end of 2014, INFORMS expects to have up to five courses in the association portfolio and one or two courses available online.

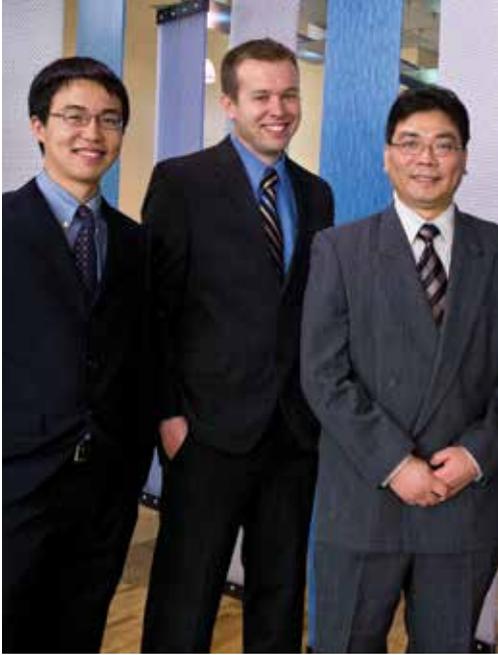

"The INFORMS Analytics Certification Program is positioned to be the *de facto* standard for analytics professionals worldwide. It will be a must-have for the analytics field in the same way PMP is for project managers."

—Greta Roberts, CEO, Talent Analytics, Corporation

### CERTIFICATION

After two years as an initiative, Certification in Analytics (CAP®) has become a popular, well known, ongoing program at the forefront of the INFORMS analytics drive. In CAP's first year working with clients, 109 people took the exam. There are now 88 Certified Analytics Professionals. Some 586 more are in the application process. INFORMS gained 70 new members directly from the certification program. CAP appeared on the radar screens of several well read publications for analytics professionals.

# 1,015

## PUBLIC RELATIONS

To support our strategic goals and strengthen our communications capabilities, we began to work with a public relations firm. The effort has resulted in article placements increasing from 340 (2012) to **1,015** (2013). We have met quarterly goals that include six interviews with the press, three speaking engagements, one business press opportunity (a bylined piece, article, interview, or mention of INFORMS), and two contributed articles.

## ANALYTICS MATURITY MODEL

INFORMS is creating an analytics maturity model to help business, government, and nonprofit organizations do an honest self-assessment about how well they use analytics. INFORMS can help these organizations improve their use of analytics by pointing them to services such as INFORMS meetings, the consultants' database, and publications like Analytics Magazine. In 2013, the AMM committee settled on the format of the model, with three themes covering 12 factors that enlighten analytics use. The committee drafted 12 questions and tested them with members who specialize in analytics. In 2014 INFORMS will move the model online, add features that benefit all types of users, and introduce the model publicly.

## SOCIAL MEDIA

The social media initiative, which began in 2012, shifted its focus in 2013 from IT to outreach. INFORMS established and expertly managed the association's presence on LinkedIn, Facebook, Twitter, OR Exchange, Google Plus, blogs, and YouTube. In fall 2013, Association Media Report, compiled by Association Trends, ranked INFORMS in the "Highest Activity" category of associations with 10—100 staffers across Facebook, YouTube, Twitter, Pinterest, and LinkedIn.

### UNIVERSITY ANALYTICS PROGRAM

A new University Analytics Program committee was instituted in 2013 to help universities and industry. Co-chaired by Michael Rappa (North Carolina State University) and Diego Klabjan, CAP (Northwestern University), the committee quickly developed three subcommittees: An information subcommittee will identify information that can aid existing and potential programs; the curriculum subcommittee will be a resource to schools doing program development by providing information and consultation on curricula and program formats; and the industry subcommittee will coordinate analytics education with academics and the practitioners, who will eventually employ their graduates.

### GETTING STARTED WITH ANALYTICS WEBSITE

The new Getting Started with Analytics section of INFORMS Online evolved from the longstanding Science of Better site. It is designed to help people find out more about analytics, what analytics can do for them and their organizations, how to start using analytics, and how others have benefited from analytics. Getting Started with Analytics includes new case studies based on Edelman presentations from recent years, a form to request an analytics mentor, and a link to the "Find an Analytics Consultant" database.

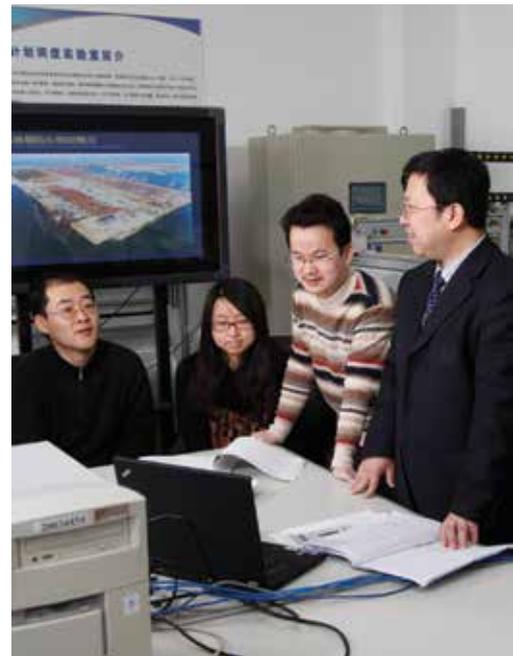

# 84,000

### CAREER CENTER

We redesigned and rebranded the former Job Placement Service and the job services provided in the print version of ORMS Today into a new Career Center. The popularity of the Career Center exceeded expectations. Since August of 2013 the number of resumes posted increased by 125%, the number of jobs posted grew by 80%, and there were more than **84,000** views of the site. The Career Center has increased opportunities for our members, industry awareness of INFORMS, and our visibility with individuals looking for analytics and O.R. positions.

### OPERATIONS RESEARCH ANALYST

Job ranked in: *US News & World Report/Money*  
#2 in Best Business Jobs  
#23 in The 100 Best Jobs

*INFORMS will provide up-to-date online systems that enable and encourage access, collaboration, and effective exchange of information, content, services, and benefits to and among members, potential members, and those interested in knowing more about OR/analytcs.*

#### **MOBILE APPLICATION**

The mobile app for meetings grew out of a 2012 partnership project with the publisher Wiley, which provided INFORMS with a technical platform and expertise. The job of formatting, cleaning, and manipulating data into a useable format was accomplished by INFORMS staff. INFORMS has subsequently introduced a successor mobile app. IT and meetings department staff plan future refinements and versatile alternatives.

#### **INFORMS CONNECT/ONLINE CONTENT SHARING**

INFORMS Connect is a new online space where members can network with colleagues, participate in discussions, add information, share documents, conduct subdivision and committee business, and keep abreast of what is happening in their communities. It works on mobile devices and enables greater networking, collaboration, and sharing of knowledge and information. INFORMS members and communities will have their activity and interest areas located on one enhanced web page.

This exciting new collaboration system was developed in 2013. Select groups began initial use as part of final testing. It became available to all members, subdivisions, and committees in 2014.

#### **SINGLE SIGN-ON (SSO)**

IT leadership at INFORMS is developing a method for members to sign onto all INFORMS services with a single username and password. When complete, SSO will simplify members' access to INFORMS systems and improve their user experiences.

#### **METADATA DATABASE**

INFORMS is creating a metadata database with rich search capability for abstracts and content published in our journals and books. When complete, it will be used to increase collaboration and knowledge exchange. In 2013, staff developed the ability to capture the required information from our journals. This will be expanded to include archived articles and a web interface to ensure ongoing extraction and archiving.

# GOAL: INCREASED ANALYTICS- BASED VALUE TO ACADEMICS

## RESOURCES FOR TEACHING ANALYTICS

We will develop an online “one-stop shop” dedicated to analytics education. It will bring together material provided by *INFORMS Transactions on Education*, the Education Committee, and the University Analytics Program Committee (see above). The web page will feature the latest analytics-focused content and will include tools, resources, and information created by the Education Committee and the University Analytics Program Committee. *INFORMS Transactions on Education* itself will expand, with special issues devoted to topics such as teaching service science as well as analytics and sports.

## WORKSHOPS TEACHING ANALYTICS

Learning from the Teaching Effectiveness Colloquium and hearkening back to its predecessor, the Teaching Management Science retreats, we are considering the creation of workshops demonstrating tools and techniques to teach analytics effectively. We will explore multiple themes, such as teaching in a business school environment, interdisciplinary topics, and workshops that focus on undergraduates. We will also consider workshops for educators transitioning from teaching courses in O.R. to courses in analytics.

*With excitement about business analytics spreading from industry to universities preparing the next generation of analytics practitioners, the INFORMS Board decided to provide the association’s many academics with ways of incorporating the new focus on analytics into their own careers.*

## EXPANSION OF “FOCUS ON” SERIES

This series highlights specific subject matter by collecting material from different journals and resources (the series includes, for example, “*Focus on Healthcare*” and “*Focus on the Environment*”). With the help of our members and the new online platform, “*Focus On*” will cover the large number of research areas studied in INFORMS journals and resources.

## DATACONNECT

Through a new initiative, DataConnect, INFORMS will help academic and industry members collaborate. The initiative will center on academics’ need to obtain datasets that permit student/academic research and industry’s chance to benefit from sharing databases whose analysis can provide profitable insights. Initially, DataConnect will contain links to datasets from our INFORMS journals and members. There are plans to expand the initiative to include links and contacts to external public datasets and to other industry.

### Case & Teaching

#### Materials Competition

Allison Elias, University of Virginia  
Tim Kraft, University of Virginia  
Gal Raz, University of Virginia

#### Daniel H. Wagner Prize

Assaf Avrahami, Yedioth Group, Israel  
Yale Herer, Israel Institute of Technology  
Retsef Levi, MIT

#### Doing Good with Good

#### OR Competition

Peng Shi, MIT

#### Franz Edelman Award

Dutch Delta Program Commissioner

#### Frederick W. Lanchester Prize

David P. Williamson, Cornell University  
David B. Shmoys, Cornell University

#### George B. Dantzig Dissertation Award

Jason Acimovic, Pennsylvania State University

#### George E. Kimball Medal

Rina R. Schneur, Verizon Laboratories  
Teresa V. Cryan, INFORMS  
Eric Wolman, George Mason University

#### George Nicholson Student

#### Paper Competition

Ruiwei Jiang, University of Florida

#### INFORMS President's Award

Arthur M. Geoffrion, University of California, Los Angeles

#### INFORMS Prize

Ford Motor Company

#### John von Neumann Theory Prize

Michel L. Balinski, CNRS and École Polytechnique

#### Judith Liebman Award

John Coles, University at Buffalo Student Chapter  
Amir H. Mousami, University of Massachusetts Student Chapter  
Monica Puertas, University of South Florida Student Chapter

#### Moving Spirit Award for Chapters

Justin Yates, Texas A&M University

#### Moving Spirit Award for Fora

Burcu B. Keskin, University of Alabama

#### Philip McCord Morse Lectureship Award

Dimitris Bertsimas, MIT

#### Prize for the Teaching of OR/MS Practice

Alexandra M. Newman, Colorado School of Mines

#### Saul Gass Expository Writing Award

Frank P. Kelly, University of Cambridge

#### Student Chapter Awards

*Summa Cum Laude Chapters*  
Texas A&M University  
University of South Florida

#### *Magna Cum Laude Chapters*

Arizona State University  
Oklahoma State University  
University of Massachusetts  
University of Oklahoma

#### *Cum Laude Chapters*

North Carolina State University  
Northwestern University  
University at Buffalo  
University of Michigan  
University of Texas-Austin  
University of Virginia  
University of Wisconsin-Milwaukee  
Virginia Tech

#### Undergraduate Operations Research Prize

Frederick Abiprabowo, University of Pennsylvania  
Napat Harinsuit, University of Pennsylvania  
Samuel Lim, University of Pennsylvania  
Willis Zhang, University of Pennsylvania

Nazli Busra Akar, Bilkent University  
Başak Kepir, Bilkent University  
Çağıl Koçyiğit, Bilkent University  
Işıl Koyuncu, Bilkent University  
Melis Beren Özer, Bilkent University  
Tunca Turkoglu, Bilkent University

#### UPS George D. Smith Prize

Naval Postgraduate School

#### Seth Bonder Scholarship for Applied Operations Research in Health Services

Pooyan Kazemian, University of Michigan

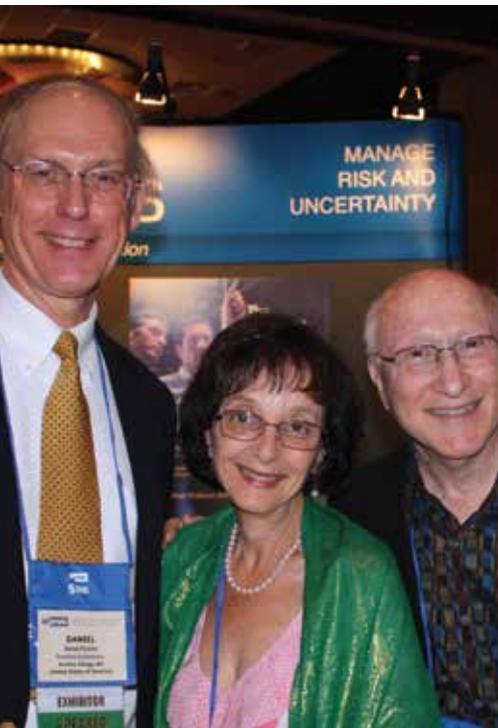

#### Seth Bonder Scholarship for Applied Operations Research in Military Applications

Nathaniel D. Bastian, Pennsylvania State University

#### INFORMS Fellows: Class of 2013

Daniel Bienstock, Columbia University  
Michael W. Carter, University of Toronto  
Morris A. Cohen, University of Pennsylvania  
Zvi Drezner, California State University, Fullerton  
T.C. Hu, University of California, San Diego  
Sheldon H. Jacobson, University of Illinois  
Patrick Jaillet, Massachusetts Institute of Technology  
Jon Lee, University of Michigan  
Anna Nagurney, University of Massachusetts  
Sheldon M. Ross, University of Southern California  
Martin Savelsbergh, University of Newcastle  
David B. Shmoys, Cornell University

## TREASURER'S REPORT

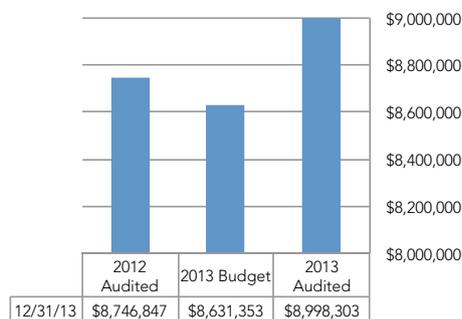

I am pleased to present INFORMS' audited results for fiscal year 2013. We received an unqualified, clean management letter in the Independent Auditor's Report from Stokes & Company.

The overall financial health of INFORMS remains strong. We ended the year with a surplus of \$229,448, or 2.5% of revenue. Our total revenue rose to more than \$9 million for the first time, due to increases in membership and the continued demand for our publications. Our expenses significantly exceeded those of FY2012 due to planned investments in our new strategic program initiatives of IT, certification, and continuing education, as well as additional expenditures in member services. Our investments contributed considerably to our overall financial position. We ended the year with a reserve balance of \$8.36 million and an additional \$6.70 million in working capital. These results provide us with the security and financial strength to invest in our future.

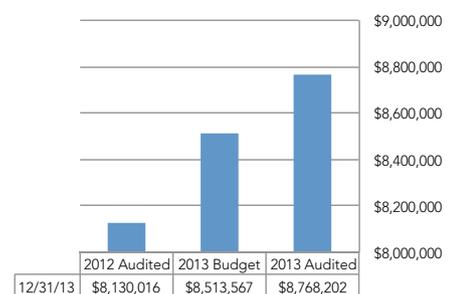

In presenting this report, I am confident that INFORMS both is and will continue to be financially sound.

Nicholas G. Hall  
Treasurer

### 2013 ACTUAL VS. BUDGET REVENUE

### 2013 ACTUAL VS. BUDGET EXPENSES

INFORMS STATEMENT OF FINANCIAL POSITION AS OF DECEMBER 31, 2013

ASSETS	2013	2012
<b>CURRENT ASSETS</b>		
Cash & Cash Equivalents	\$ 5,657,280	\$ 5,606,934
